

PROFILE

"Hi, my name is WAI YAN AUNG, and I left from Technological University (Monywa) since COVID-19 happened. But now I'm learning web development and Japanese N2. I specialize in front-end development using technologies like HTML, CSS, and JavaScript. I also have experience working with Bootstrap.

I'm always looking to enhance my skills, and I enjoy working in environments where I can collaborate with teams to create efficient and user-friendly websites. My attention to detail and ability to problem-solve have helped me in delivering projects on time and to client specifications.

I'm excited about the opportunity to contribute to Your Company, as I believe my skills and passion align well with the team's goals and the challenges ahead."
